DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to because Japanese character has been used (figure 1). It should be noted that all Japanese character need to be translated to English. Correction is required. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Taira et al., US Patent No. 5,712,694.

The above claims are clearly anticipated by Taira et al. figures 31-32 and accompanying text which disclose a liquid crystal display (LCD) device (figure 31) comprising:

. an LCD panel (2604) having a polarization plate (2602) arranged at a light input side of an LCD cell (2601);

. a light source (2605);

. a light guide plate (2611);

. a light control sheet (a half-wave film 2610) interposed between the light guide plate and the polarization plate, wherein the light control sheet rotates polarized light emitted from the light guide plate toward a direction of light transmission axis of the polarization plate (see figure 32 and col. 21, lines 27-32).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hiraishi (US 2001/0003472), a patent application publication of the instant application.
